

**DRILL RIG VALUATION INSTRUCTIONS**

It is the responsibility of the taxpayer to certify to you the manufactured year of the rig, the manufacturer's depth rating and whether the rig is mechanical or electrical.

**COMPUTATION**

The replacement cost new (R.C.N.) is determined by the manufacturer's depth rating. Once the replacement cost new is determined, you would apply the "Trended % Good" to that figure to determine the market value. The percentage to be used will be determined by the year manufactured.

**EXAMPLE:** The taxpayer has a mechanical drill rig manufactured in 2003 with a manufacturer's depth rating of 8,500. Using the schedules the R.C.N. is \$998,750. The "% good" is 72%.

$$\begin{aligned} 998,750 \times 72\% &= 719,100 = \text{market value} \\ 719,100 \times 3\% &= 21,573 = \text{taxable value} \end{aligned}$$
